https://itskaywat.github.io/construction-portfolio-project

Hello,

I'm excited to submit my proposal for your website development project. I've recently completed a comprehensive business website for a construction company that includes all the features you're looking for - mobile-responsive design, contact forms, social media integration, and a detailed client questionnaire.

View my recent work:
- BuildRight Construction

This project demonstrates my ability to:

- Create professional, user-friendly interfaces with modern design principles
- Implement mobile-responsive layouts that look great on all devices
- Develop interactive forms including contact forms and detailed questionnaires
- Integrate social media with proper linking and display
- Ensure fast loading times and performance optimization
- Apply SEO best practices throughout the site

I have implemented a client questionnaire component, which collects detailed information while maintaining a user-friendly experience - exactly what you've described for your project.

Based on your requirements, I can deliver a professional website with all requested features within your budget through a 2 milestone approach if this meets your standards:
Milestone 1 ($75): Design approval, site structure, and responsive framework
Milestone 2 ($75): Feature implementation (forms, questionnaire, social integration) and launch

I'm available to start immediately and would be happy to discuss any questions you might have about my approach or timeline.

Thank you for your consideration,
Chris Loetz
